

RETROFITS & REBUILDS *From Magnets to Full Assemblies*

In business today, it's more important than ever to maximize operating efficiency and minimize production costs. That's why Angstrom Sciences provides complete repair and rebuild services that will bring the Angstrom Advantage™ to your process and improve your assembly's overall performance.

FLEXIBLE UPGRADES

Our engineers can retrofit your existing magnetrons with our high-strength rare earth magnets, our patented magnetic profiling, and turbulent water flow design.

IMPROVED PERFORMANCE

The results will substantially increase your system's power, uniformity, target utilization, and overall efficiency.

PROVEN RESULTS

Performance results have been so overwhelming that Angstrom Sciences has developed "standard" retrofits for the most common designs, including:

- BOCCT/HRC
- CVC
- Leybold
- MRC
- Perkin-Elmer
- And all Cylindrical Magnetrons

ECONOMICAL SOLUTION

These standard designs not only provide you with an economical alternative to replacing old equipment. Additionally, many of our retrofits feature a drop-in design, eliminating the need to send your equipment out and reducing your overall downtime.

REPLACEMENT PARTS

Of course, we can also provide replacement parts on an express basis when you need them.

TOTAL COMMITMENT

Angstrom Sciences is dedicated to helping our customers develop the most productive and cost-effective thin film applications by providing the world's most advanced magnetrons, high quality deposition materials, and comprehensive technical support.

And we stand ready to ensure your satisfaction.
